Education

B.Tech in Computer Science & Communication Engineering, Kalinga Institute of Industrial Technology 2023 – Present

- **SGPA (Sem VI):** 9.96/10.00 | **CGPA (Sem I-VI):** 9.30/10.00

Work Experience

SWE (AI/ML) Intern, Starvox Labs Private Ltd. April 2026 – Present

- Contributed to scaling of an AI voice agent enabling autonomous call handling and interactive video meetings (screen sharing, presentations, web navigation), supporting 15,000+ calls/month.
- Designed and developed a node-based workflow automation builder supporting 25+ configurable nodes for an AI-powered content generation and ad campaign orchestration platform.

Web Developer Intern, Secuodsoft Technologies Private Ltd. May 2025 – June 2025

- Developed a Django-based web application that extracts text from uploaded images by integrating Tesseract for OCR and Pillow for preprocessing.
- Gained experience with Flask, Django, and RESTful APIs while contributing to scalable web application development.

Projects

BLE Attendance App | React Native, Flask March 2026

- Engineered a Bluetooth Low Energy based attendance application using RSSI for proximity validation, enabling automated and contactless attendance marking for 100+ concurrent users per session.
- Architected a system with role-based access (Admin, Teacher, Student) improving system security and reliability.
- Conducted real-world testing across classrooms and hostel environments, generating and analyzing large scale attendance logs (10,000+) to evaluate BLE reliability and system robustness.

Social Media Platform | Django, WebSockets, PostgreSQL, Redis December 2025

- Designed a social media platform supporting user authentication, media posts, likes, comments and real-time messaging using Django Channels with Redis as a channel layer, enabling low-latency communication.
- Implemented membership-based authorization for group chats, enforcing access control at both application and messaging layers.
- Simulated concurrent user activity to assess performance under load and identify bottlenecks in feed generation and message delivery.

Image Caption Generator WebApp | TensorFlow, Django July 2025

- Developed an end-to-end image captioning pipeline using VGG16 encoder + LSTM decoder trained on 40,000+ captions, achieving BLEU-1: 0.52, BLEU-2: 0.31.
- Built a Django web application with a responsive UI and asynchronous form handling.

Driver Drowsiness Detector | TensorFlow, OpenCV June 2025

- Built a real-time Driver Drowsiness Detector using Convolutional Neural Networks and Computer Vision techniques.
- Obtained 95.87% accuracy with CNN having 10 million parameters, trained on 4200+ labeled images.

Technical Skills

Languages: C++, Python, Java, SQL, HTML, CSS, JavaScript

Technologies: Django, Flask, FastAPI, Next.js, React Native, TensorFlow

Certifications

- AI/ML with Projects Using Python
- AWS Academy Cloud Foundations
- Backend Developer - SAP Cloud Application Programming Model
